ROBOTIC DETAIL PAVEMENT MARKING

**Detail Road Markings With
No Stencils
No Burners
No Boots on the Ground**

Improve Productivity

- Only ONE operator is needed to paint
- Fast - paints a turn arrow in 3 minutes and there is no equipment to unload and reload from the truck
- No Chalk & String - layout is done in minutes
- Clean up is a quick 10 minute flush

Improve Road Worker Safety

- Operator stays in the truck cab during layout, painting and placing cones
- Automated Reverse-A-Clean tip flipper clears a paint clog with the touch of a button
- No lifting of heavy equipment
- Robot places safety cones

Improve Precision

- MUTCD library of symbols to meet specifications every time
- Operator controls paint thickness and bead dispersion
- Novice painters paint like a pro
